# Fakhar Ud Din Khokhar

Senior SQA Engineer
Lahore, Pakistan · +92 323 8998463 · fakharuddinkhokhar@gmail.com · linkedin.com/in/fakhar-ud-din-khokhar-435551ba

## SUMMARY

Software QA engineer with 8+ years testing web and mobile products for startups and global platforms, now at inDrive. Runs functional, regression, API and payment testing on Android and iOS, builds Appium and Selenium suites, and signs off releases.

## EXPERIENCE

**SQA Engineer** Apr 2026 – Present
inDrive, Remote

- Test a mobility platform used in 48 countries and 1,000+ cities, writing test plans and scenarios for every new feature.
- Run manual, exploratory and regression passes on real devices and emulators across Android and iOS before each rollout.
- Build and maintain Appium UI automation for both platforms, and test APIs directly to verify what the app sends and receives.

**Senior Software Test Engineer** Feb 2025 – Mar 2026
Homie, Remote

- Established the test strategy and process for a cash-back product on web, mobile web, Android and iOS over a 14-month tenure.
- Executed regression and smoke suites before every deployment, with API testing and database validation behind each flow.
- Developed Appium automation for app regression, cutting hands-on effort per cycle, and tracked defects in Jira with clear priority.

**Senior Software Test Engineer** Aug 2024 – Feb 2025
Aerodyne Group, Lahore

- Automated regression for a SaaS drone-operations web product with Robot Framework and Selenium WebDriver.
- Wrote test cases from business requirements and ran functional, regression and smoke passes across multiple environments.

**Senior Software Test Engineer** Sep 2021 – Jul 2024
The Entertainer, Lahore

- Led QA for the web, Android and iOS apps of a lifestyle savings service live in more than 14 countries, from 2021 to 2024.
- Planned and signed off testing for launches and seasonal campaigns, covering Adyen, Tabby and Checkout.com payments, Deliverect orders, and Braze, MoEngage and Firebase analytics events.
- Built Selenium and Appium suites in Java with TestNG and the Page Object Model, cutting regression time by about 40% with zero P1 defects after release.

**Software Test Engineer (promoted from Associate QA Engineer)** Aug 2019 – Sep 2021
CarSwitch Arabia, Lahore

- Planned and ran functional, regression and system testing for a car marketplace live in the UAE and Saudi Arabia, over 2 years.
- Built the Selenium regression suite in Java on TestNG and the Page Object Model, growing it from first cases into the team standard.
- Validated backend data against the UI through API checks, and scraped competitor listings with custom scripts for analysis.

**QA Intern** Feb 2019 – Jul 2019
GlowfishLabs, Lahore

- Built listing datasets from 4 automotive marketplaces with Octoparse and C#, validated for business use.
- Executed manual checks on web and mobile builds alongside the QA team, reporting defects with reproduction steps.

## SKILLS

**Testing:** Test planning, Functional, regression and exploratory testing, API and database testing, Payment gateways and integrations
**Automation:** Selenium, Appium, Playwright, Cypress, Robot Framework, TestNG, Page Object Model and Page Factory
**API and performance:** Postman, REST Assured, JMeter
**Languages and tools:** Java and Python, Jira and TestRail, Git, MS SQL Server
**Certificates:** Software Testing, Selenium Basics, Postman API, Python Fundamentals and GitHub (Great Learning, 2024)
**Writing:** 2 Medium articles on setting up Appium and Selenium with Java in IntelliJ IDEA

## EDUCATION

**University of Management and Technology** Sep 2014 – Jun 2018
B.S., Software Engineering · Lahore
